Meat & Fish Industry

Made in Germany

Was presented the *International FoodTec Award 2012*

„food technology Lummer“

International FoodTec Award in Silver:
food technology Lummer (Delbrück/Germany)
“Hygiene compliant cutting technology”

The company “food technology Lummer” receiving a Silver Award for its Hygiene Compliant Cutting Technology innovation. (From left to right) Alfons Lummer and Prof. Achim Stiebing, DLG

The modular designed universal plant U-300 by food technology Lummer for the cutting, decoration and packaging of baked goods and pastry products features a new cleaning concept for companies of all sizes. Traditional and newly developed machine components are combined into a properly interlacing production line, which complies with the hygiene standards of the European Hygienic Engineering and Design Group (EHEDG) and food safety requirements. Rounded surfaces, as well as clearly defined dripping edges in combination with an open construction are the features of this hygiene compliant machine concept; the fully automatic cutting technology operates on ultrasonic principles.

Hygiene compliant cutting technology – Ultrasonic cutter for ginger candy

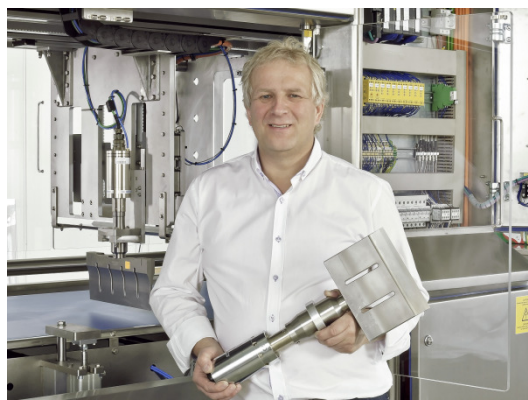

Was nominated for the **Great Award for Medium-Sized Businesses 2012**

“food technology Lummer” obtained this nomination thanks to its high level of commitment in the region under the motto: “Healthy medium-sized businesses – strong economy”.
